"Get More Targeted Search Engine Traffic With Articles Optimized To Give You Prized Rankings That Explode Your Sales!"

If You Regularly Write Articles, Press Releases, Blog Entries, Or Any Type of Content You Publish On The Web, Then You Can Dramatically Increase Your Search Rankings With This Easy-To-Use Tool!

Dear Friend,

Getting your content listed in the search engines is the key to profiting from your efforts. If your articles, press releases, or blog entries fail to get a good rank in the search engines, they often end up being worthless to you.

This is why it's essential that you make sure your articles are optimized for the search engines. One of the most important ways to do this is to make sure you have the right keyword density for the search terms you want to get ranked for.

If you include your keyword too much, then you're going to likely get penalized. If you don't put it in not enough, then you'll miss the mark of what the search engines want.

Simply put,...

To Reap Large Amounts Of Search Engine Traffic You Must Get Your Keyword Density Exactly Right!

Of course, you can go through all of your articles and compute your keyword density

manually. But, this takes forever with more than one or two articles.

Or you can make sure you have the perfect density every time and within seconds using a new tool called, "Article Analyzer."

Article analyzer is a piece of software that automatically computers the exact keyword density with a few clicks of your mouse.

As a result, you can rest assured your articles are optimized to claim profitable search engine rankings!

Here's The Full Range of Benefits You Get:

- ✓ **Quickly "test" all your articles prior to publishing them on the web to make sure you don't waste all of your effort!** Relax knowing all of the time spent on each article is likely to pay off!
- ✓ **Ensure your keyword density is accurate for easy search engine approval.** Never miss-judge whether an article is going to hit the bullseye, costing you a prized profitable search engine ranking you could've easily had!
- ✓ **Quick catch and correct any spelling errors that might exist with built-in spell-checker.** Nothing's worse than working for hours over an article and having an overlooked spelling error limit its success!
- ✓ **Get the word count, the number of times a chosen word or phrase occurs throughout the content, and the density percentage.** All of the data to make smart decisions so your articles pay handsomely are here!
- ✓ **Save each article in either .txt or HTML format for full flexibility and saved time!** Your content is ready for you to submit to directories, online newswires, or publish on your website!
- ✓ **Quickly spot your keywords inside your article with built-in highlighting feature!** This is a huge time saver when you're trying to edit your articles!
- ✓ **Plus, more features to save you time and give the information you need to succeed with your content!**

The bottom-line of why this tool is so important to your success comes down to this question...

How Much Time, Effort, and Money Are You Throwing Away With Content That Fails To Get Ranked In The Search Engines?

Just consider... if you create 10 articles and only 6 of them get in the search engines, then 4 articles are going to produce absolutely nothing after they're first published.

You wasted your effort or money if you hired a writer. Yet, this is what happens far more often than it has to.

Simply run your content through Article Analyzer to ensure the search engines are going to like it. As a result, you're likely going to make far more money from your content.

Moreover, the investment of only \$27 for your copy is going to look like a tiny drop in the buck. It's an amount just 1 profitable search engine listing can quickly make back.

All you have to do is grab your copy below now!

It's crazy...

You've got all this "background" work to do and SO little time to do it.

You KNOW what I'm talking about. Getting the rank and rank statistics of your own web pages is key to operating at peak search engine and marketing efficiency. And it certainly doesn't hurt to know the rank of your competitors' sites as well.

The trouble is... gathering this type of crucial information can eat up hours and hours of your valuable time. And I'm certain we can both agree that time is one of (if not THE) most important assets we Marketers have.

The Great And All-Powerful Rank Wizard Comes To The Rescue!

At a desk, not too long ago...

I've been sitting at my computer for several hours, gathering the rank and rank statistics of hundreds of pages on dozens of websites. It's 2:30 in the morning and I'm not even close to being finished.

I'm tired... I'm frustrated... and I'm thinking there's GOT to be a better way. I mean, I can't be the ONLY person who needs a program to do this kind of work for me. So...

Like every other occasion when I'm hoping for a time-saving, work-reducing solution, I start searching the 'net. And as usual, I come up empty-handed.

Oh sure, there are various programs and services out there, but nothing that does the exact job I want and NEED it to. So yet again, there's only one thing left for me to do... I'll have to create my OWN software program!

And you know what? That's precisely what I did! And the name of this little fellow? SEO Spider. But don't think he's just some insignificant "bug". This guy is WAY powerful.
